About Me

Three years renovating homes and businesses taught me more than I had anticipated about programing and styling from meticulous planning and storyboarding to researching and fast learning on the job. As a CNA I found that not knowing how to do something isn't a valid reason to not get something done or pawn it off a co-worker; you need to adapt.

after I began teaching myself how to code in 2017 I knew it was what I wanted to pursue for the rest of my life, and now as a full stack developer, I am eager to enter the programming industry and continue learning and contributing.

PROJECTS

-Created a personal portfolio using Rails, HTML/CSS, and JS implementing:
  -Action Cable (live commenting)
  -Devise (content authentification)
  -petergate (content authorization)
  -google maps / Twitter API
  -and drag and drop functionality
 (created via JS)

-several small games (Black Jack, Battle Ship, etc...

-created an app using TS and Angular, with ruby on rails to help free lancers track and create custom proposals for clients.

- An overtime measuring, submitting, and approving app where employees can submit overtime hours and employers (admins) will be able to review, approve, or reject them; all using BDD and TDD (rspec)

- A production site for Breeze Builders LLC, allowing customers to request bids on specified future projects, view company licenses, and see past jobs before and after pictures and descriptions. Implemented admin functionality to keep site current and respond to bid requests and questions.

All of these in addition to other personal projects

WORK EXPERIENCE

- CERTIFIED NURSES ASSISTANT
Cascades at Riverwalk Rehabilitation
|2017|
functioned for the greater part of 2017 as CNA/ Nursing Student caring for anywhere from 12-18 almost fully dependent patients for 12 hours at a time.

- CONTRUCTION INDUSTRY
813 Construction |2014-2016|
Worked full time building and renovating homes and small businesses..

EDUCATION

- Bottega Tech

- Over **600 hours** of in-class hands on learning and experience. In and out of class I worked on several rails and angular **projects described above**.

- One year of generals at **Utah Valley University** and **Salt Lake Community College**

- High School Diploma

LANGUAGES AND FRAMEWORKS

-MVC -Object Oriented Programing -Full Stack Web Development -Version Control -SQL
-TDD -BDD -Project Management -API's
